

Section 3.7 Non Chapter 15 Program Activities Throughout the Region ('Regionwide')

The RWQCB regulates discharges to land to protect water quality. The RWQCB authorizes Waste Discharge Requirements (WDRs), reviews self-monitoring reports submitted by the dischargers, performs independence compliance inspections, and takes necessary enforcement actions. If the RWQCB determines it is not against the public interest, it can waive issuance of WDRs. It can also waive the requirement to submit a Report of Waste Discharge.

Priorities for FY 02/03 are shown in Chapter Appendix A.
